4 INTRODUCTION

The Kommander[™] Builder allows you to configure the Red Alert[™] product to address clients' needs. This software is intended for the integrator specifically responsible of the Red Alert[™] configuration, which is the graphic interface allowing users to communicate with the other components of the Kommander[™] system.

This manual explains how to install and update the software.

5 INSTALLATION PROCESS

5.1 Prerequisite

The latest version of Red Alert[™] ensures smooth functioning of Kommander[™] Builder. If necessary, see Red Alert[™] Installation guide.

5.2 Installation

- 1. Download Kommander Builder[™] Installer compressed folder (KommanderBuilderInstaller.zip).
- 2. Extract the folder.
- 3. Double click on Setup.msi.
- 4. Select the preferred installation language.

Language selection		
R	Please select a language for the installation process.	
	English ~	
	OK Cancel	

Language Selection Dialog

5. Click Next.

🐻 KommanderBuilder Setup	– 🗆 X
	Welcome to the KommanderBuilder Setup Wizard
	Next > Cancel

6. Read the End-User License Agreement and decide if you accept the terms of the agreement.

Final Step

6 UPDATING

6.1 Notification

When a new version of Kommander[™] Builder is available, an icon is displayed in the upper right corner of the application.

Click the icon to start downloading the new version: then close Kommander™ Builder and perform the installation as described in the <u>Installation</u> section. The previous configuration is preserved.

New Version Available Dialog

6.2 Version Check

The *About* option of the *File* menu of the application allows you to display the current version of the configurator and to check if updates are available by using the *Check for latest...* button. When a new version is available, you are invited to download it.

The End-User License Agreement is also displayed when selecting the *About* option.

Software Version Check
